A Little History of Poetry

Carey, John

Little Histories (Yale U.P.)

2020 : 03 320 p. Hardback 9780300232226 US\$25.00

John Carey tells the stories behind the world's greatest poems, from the oldest surviving one written nearly four thousand years ago to those being written today. Carey looks at poets whose works shape our views of the world, such as Dante, Chaucer, Shakespeare, Whitman, and Yeats. He also looks at more recent poets, like Derek Walcott, Marianne Moore, and Maya Angelou, who have started to question what makes a poem "great" in the first place. This little history shines a light on the richness and variation of the world's poems - and the elusive quality that makes them all the more enticing.

Stan Lee: A Life in Comics

Leibovitz, Liel

Jewish Lives (Yale U.P.)

2020 : 06 192 p. Hardback 9780300230345 US\$26.00

Few artists have had as much of an impact on American popular culture as Stan Lee. The characters he created - Spider-Man and Iron Man, the X-Men and the Fantastic Four - occupy Hollywood's imagination and production schedules, generate billions at the box office, and come as close as anything we have to a shared American mythology. This illuminating biography focuses as much on Lee's ideas as it does on his unlikely rise to stardom. It surveys his cultural and religious upbringing and draws surprising connections between celebrated comic book heroes and the ancient tales of the Bible, the Talmud, and Jewish mysticism.

The History of the Fujiwara House: An Introduction to and Translation of the Toshi Kaden

Bauer, Mikael

(Renaissance Books)

2020 : 03 Hardback 9781912961184 £55.00

With the addition of a contextualized introduction, here is the first annotated translation of the eighth-century clan history Tōshi Kaden or the History of the Fujiwara House. Hitherto, scholars have focused on the more famous eighth-century imperial histories Nihon Shoki and Kojiki, but other sources such as the History of the Fujiwara House provide a narrative that complements or deviates from the official histories. The book was written to provide students and researchers with additional material to reconsider the political and intellectual currents of seventh- and eighth-century Japan and, in addition, reveal further insight into the career and motivations of its controversial author, the courtier Fujiwara no Nakamaro.

Language Teacher Recognition: Narratives of Filipino English Teachers in Japan

Stewart, Alison

New Perspectives on Language and Education (Multilingual Matters)

2020 : 04 152 p. Hardback 9781788927895 £99.95

This book presents the career narratives of an under-researched group of teachers: immigrant Filipino teachers of English working mainly with young and very young learners in Japan. It provides a nuanced and revealing critique of poststructuralist views of identity and proposes recognition theories as an alternative perspective. It explores the role of the community found in language teacher associations in the formation and strengthening of language teacher identity and reveals new insights into morality and social justice in language teacher identity. The narratives of the teachers and the communities of which they are part demonstrate how prejudice affects these teachers' lives, and how speaking about and celebrating success can affirm individual and group identity.

2020 : 04 193 p. Hardback 9781527545373 £58.99

Contributors 宮下 治政：鶴見大学文学部英語英米文学科 准教授／大澤ふよう：法政大学文学部英文学科 教授／時崎 久夫：札幌大学外国語学部 教授

This volume brings together contributions tracing the complex paths of change taken by the English language in its long history, from its beginnings in Old English to the present day. It addresses issues in a variety of fields ranging from semantics and morphosyntax to the interface between syntax and phonology, using a number of different theoretical standpoints. As such, the text reflects a diversity of approaches to corpora, and will serve to improve the reader's understanding of some of the many developments and alterations that have affected English. It will be of interest to all scholars and students working on the history of English, as well as students of historical linguistics in general.

My Neighbor Totoro is a long-standing international icon of Japanese pop culture that grew out of the partnership between the legendary animator Miyazaki Hayao and the world-renowned composer Joe Hisaishi. A crucial step in the two artists' collaboration was the creation of the album, *My Neighbor Totoro: Image Song Collection*, with lyrics penned by Miyazaki and Nakagawa Rieko, a famed children's book author, and music composed by Hisaishi. The album, released in 1987 prior to the opening of the film, served not only as a promotional product, but also provided Miyazaki with concrete ideas about the characters and the themes of the film. This book investigates the extent to which Hisaishi's music shaped Miyazaki's vision by examining the relationship between the images created by Miyazaki and the music composed by Hisaishi, with special emphasis on their approaches to nostalgia, one of the central themes of the film.

An Introduction to Art

Harrison, Charles

(Yale U.P.)

2020 : 03 344 p. Paperback 9780300247138 US\$25.00

Charles Harrison's landmark book offers an original, clear, and wide-ranging introduction to the arts of painting and sculpture, to the principal artistic print media, and to the visual arts of modernism and post-modernism. Covering the entire history of art, from Paleolithic cave painting to contemporary art, it provides foundational guidance on the basic character and techniques of the different art forms, on the various genres of painting in the Western tradition, and on the techniques of sculpture as they have been practiced over several millennia and across a wide range of cultures.

Harvard Art Museums (Yale U.P.)

2020 : 10 448 p. 560 color illus. Hardback 9780300250909 US\$65.00

Over more than four decades, Robert and Betsy Feinberg have assembled the finest private collection of Edo-period Japanese painting in the United States. The collection is notable for its size, its remarkable quality, and its comprehensiveness. It represents virtually every stylistic lineage of the Edo-period (1615-1868) - from the gorgeous decorative works of the Rinpa school to the luminous clarity of the Maruyama-Shijo school, from the "pictures of the floating world" (ukiyo-e) to the inky innovations of the so-called eccentrics - in addition to sculpture from the medieval and early modern periods. Hanging scrolls, folding screens, handscrolls, albums, and fan paintings: the objects are as breathtaking as they are varied.

Colorful, wildly imaginative, and technically innovative, majolica was functional and aesthetic ceramic ware. Its subject matter reflects a range of 19th-century preoccupations, from botany and zoology to popular humor and the macabre. *Majolica Mania* examines the medium's considerable impact, from wares used in domestic settings to monumental pieces at the World's Fairs. Essays by international experts address the extensive output of the originators and manufacturers in England - including Minton, Wedgwood, and George Jones - and the migration of English craftsmen to the U.S. New research including information on important American makers in New York, Baltimore, and Philadelphia is also featured. Fully illustrated, the book is enlivened by new photography of pieces from major museums and private collections in the U.S. and Great Britain.

Jon Elster writes in the spirit of Alexis de Tocqueville, who described this tumultuous era with an eye toward individual and group psychology and the functioning of institutions. Whereas Tocqueville saw the old regime as a breeding ground for revolution, Elster, more specifically, identifies the rural and urban conflicts that fueled the constitution-making process from 1789 to 1791.

Takayama, Fumihiko

(Hurst)

2020 : 04 320 p. Hardback 9781787383401 £25.00

This book offers a compelling account of the two-pronged fight against both leprosy and the discrimination that comes with it. Leprosy is generally weak against the immune system, yet it persists in populations with inadequate nutrition and weak resistance, due to poverty or lack of disease control measures. Thus the battle against leprosy has involved a highly effective multidrug therapy, and getting it to communities in need. *The Last and Longest Mile* tells the story of the WHO's offering of this cure, free of charge across the world, in 1995-9, through vital funding from the Nippon Foundation; and of how the Foundation has continued pursuing elimination of leprosy in the years since. Yohei Sasakawa, the organisation's chairman, has personally travelled the world to lead the struggle against the disease, and particularly to combat discrimination against leprosy patients or ex-patients and their families - an effort that has lagged behind the campaign to eradicate the disease itself.

A widespread assumption in political science and international relations is that cognitive biases - quirks of the brain we all share as human beings - are detrimental and responsible for policy failures, disasters, and wars. In *Strategic Instincts*, Dominic Johnson challenges this assumption, explaining that these nonrational behaviors can actually support favorable results in international politics and contribute to political and strategic success. By studying past examples, he considers the ways that cognitive biases act as "strategic instincts," lending a competitive edge in policy decisions, especially under conditions of unpredictability and imperfect information.

Federalism was James Madison's great invention. An innovative system of power sharing that balanced national and state interests, federalism was the pragmatic compromise that brought the colonies together to form the United States. Yet, even beyond the question of slavery, inequality was built into the system because federalism by its very nature meant that many aspects of an American's life depended on where they lived. Over time, these inequalities have created vast divisions between the states and made federalism fundamentally unstable. In *The Divided States of America*, Donald Kettl chronicles the history of a political system that once united the nation - and now threatens to break it apart.

The Decline and Rise of Democracy: A Global History from Antiquity to Today

Stasavage, David

The Princeton Economic History of the Western World (Princeton U.P.)

2020 : 06 424 Hardback 9780691177465 ¥4,690

Historical accounts of democracy's rise tend to focus on ancient Greece and pre-Renaissance Europe. *The Decline and Rise of Democracy* draws from global evidence to show that the story is much richer - democratic practices were present in many places, at many other times, from the Americas before European conquest, to ancient Mesopotamia, to precolonial Africa. Delving into the prevalence of early democracy throughout the world, David Stasavage makes the case that understanding how and where these democracies flourished - and when and why they declined - can provide crucial information not just about the history of governance, but also about the ways modern democracies work and where they could manifest in the future.

Democratic Federalism: The Economics, Politics, and Law of Federal Governance

Inman, Robert & Rubinfeld, Daniel L.

(Princeton U.P.)

2020 : 06 448 Hardback 9780691202129 ¥6,030

Around the world, federalism has emerged as the system of choice for nascent republics and established nations alike. In this book, leading scholars and governmental advisers Robert Inman and Daniel Rubinfeld consider the most promising forms of federal governance and the most effective path to enacting federal policies. The result is an essential guide to federalism, its principles, its applications, and its potential to enhance democratic governance.

Let the People Rule: How Direct Democracy Can Meet the Populist Challenge

Matsusaka, John G.

(Princeton U.P.)

2020 : 02 312 p. Hardback 9780691199726 ¥4,010

Propelled by the belief that government has slipped out of the hands of ordinary citizens, a surging wave of populism is destabilizing democracies around the world. As John Matsusaka reveals in *Let the People Rule*, this belief is based in fact. Over the past century, while democratic governments have become more efficient, they have also become more disconnected from the people they purport to represent. The solution Matsusaka advances is familiar but surprisingly underused: direct democracy, in the form of referendums. While this might seem like a dangerous idea post-Brexit, there is a great deal of evidence that, with careful design and thoughtful implementation, referendums can help bridge the growing gulf between the government and the people.

As the 2020 presidential campaign begins to take shape, there is widespread distrust of the fairness and accuracy of American elections. In this timely and accessible book, Richard L. Hasen uses riveting stories illustrating four factors increasing the mistrust. Voter suppression has escalated as a Republican tool aimed to depress turnout of likely Democratic voters, fueling suspicion. Pockets of incompetence in election administration, often in large cities controlled by Democrats, have created an opening to claims of unfairness.

Could understanding whether elections make people happy and bring them closure matter more than who they vote for? What if people did not vote for what they want but for what they believe is right based on roles they implicitly assume? Do elections make people cry? This book invites readers on a unique journey inside the mind of a voter using unprecedented data from the United States, the United Kingdom, Germany, France, South Africa, and Georgia throughout a period when the world evolved from the centrist dominance of Obama and Mandela to the shock victories of Brexit and Trump.

2019 : 08 252 p. Hardback 9780252042607 US\$99.00 Paperback 9780252084430 US\$27.95

On September 18, 1928, Myles Yutaka Fukunaga kidnapped and brutally murdered ten-year-old George Gill Jamieson in Waikiki. Fukunaga, a nineteen-year-old nisei, or second-generation Japanese American, confessed to the crime. Within three weeks, authorities had convicted him and sentenced him to hang, despite questions about Fukunaga's sanity and a deeply flawed defense by his court-appointed attorneys. Jonathan Y. Okamura argues that officials "raced" Fukunaga to death - first viewing the accused only as Japanese despite the law supposedly being colorblind, and then hurrying to satisfy the Haole (white) community's demand for revenge.

In Search of the Soul: A Philosophical Essay

Cottingham, John

(Princeton U.P.)

2020 : 01 192 Hardback 9780691174426 ¥3,080

The concept of the soul has been a recurring area of exploration since ancient times. What do we mean when we talk about finding our soul, how do we know we have one, and does it hold any relevance in today's scientifically and technologically dominated society? From Socrates and Augustine to Darwin and Freud, *In Search of the Soul* takes readers on a concise, accessible journey into the origins of the soul in Western philosophy and culture, and examines how the idea has developed throughout history to the present. Touching on literature, music, art, and theology, John Cottingham illustrates how, far from being redundant in contemporary times, the soul attunes us to the importance of meaning and value, and experience and growth. A better understanding of the soul might help all of us better understand what it is to be human.

Harding, John S. et al. (ed.)

(Bloomsbury Academic)

2020 : 03 232 p. Hardback 9781350140639 £85.00

Buddhism in the Global Eye focuses on the importance of a global context and transnational connections for understanding Buddhist modernizing movements. It also explores how Asian agency has been central to the development of modern Buddhism, and provides theoretical reflections that seek to overcome misleading East-West binaries. Using case studies from China, Japan, Vietnam, India, Tibet, Canada, and the USA, the book introduces new research that reveals the permeable nature of certain categories, such as "modern", "global", and "contemporary" Buddhism. In the book, contributors recognize the multiple nodes of intra-Asian and global influence.

Offering a bold new understanding of who we are, where we came from, and where we are going, noted ecologist Mark Bertness argues that human beings and their civilization are the products of the same self-organization, evolutionary adaptation, and natural selection processes that have created all other life on Earth. Bertness follows the evolutionary process from the primordial soup of two billion years ago through today, exploring the ways opposing forces of competition and cooperation have led to current assemblages of people, animals, and plants.

Chapman, John W.M.

(Renaissance Books)

2020 : 03 144 p. Hardback 9781912961092 £55.00

Sorge's activities between 1930 and 1942 have tended to be lauded as those of a superlative human intelligence operator and the Soviet Union's GRU (Soviet military intelligence unit) as the optimum of spy-masters. Although it was unusual for a great deal of inside knowledge to be obtained from the Japanese side, most attention has always been paid on the German side to the roles played by representatives of the German Army in Japan. This book, supported by extensive notes and a bibliography, by contrast, highlights the friendly relations between Sorge and Paul Wenneker, German naval attaché in Japan from 1932 to 1937 and 1940-45. Wenneker, from extensive and expanding contacts inside the Japanese Navy (and also concealed contacts with the Japanese Army) supplied Sorge with key information on the depth of rivalry between the Japanese armed services.

US-Japan Human Rights Diplomacy Post 1945: Trafficking, Debates, Documents and Outcomes

Buckley, Roger

(Renaissance Books)

2020 : 04 240 p. Hardback 9781912961122 £75.00

This is a pioneering study of a worsening human rights issue, supported by documentary evidence (Part I) with Part II providing an extensive collection of primary sources, including international covenants, US Trafficking In Persons and Congressional reports, and Japanese government papers. The author describes and assesses how the United States, post-1945, has deployed public diplomacy to lead the global fight against sexual and labour trafficking. In particular, it traces how the US has named and shamed its key ally Japan to improve its human rights performance as measured by US annual listings of trafficking activity. Japan's belated attainment of Tier One ranking suggests that the US in some circumstances has been able to succeed in its declared 'war' on domestic and international trafficking.

Manchuria is a historical region, which roughly corresponds to Northeast China. The Manchu people, who established the last dynasty of Imperial China (the Qing, 1644-1911) originated there, and it has been the stage of turbulent events during the twentieth century: the Russo-Japanese war, Japanese occupation and establishment of the puppet state of Manchukuo, Soviet invasion, and Chinese civil war. This innovative and accessible historical survey both introduces Manchuria to students and general readers and contributes to the emerging regional perspective in the study of China.

In this explosive book, Sean Roberts reveals how China has been using the US-led global war on terror as international cover for its increasingly brutal suppression of the Uyghurs, and how the war's targeting of an undefined enemy has emboldened states around the globe to persecute ethnic minorities and severely repress domestic opposition in the name of combatting terrorism.

Laver, Michael

(Bloomsbury Academic)

2020 : 04 184 p. Hardback 9781350126039 £85.00

Michael Laver examines how the giving of exotic gifts in early modern Japan facilitated Dutch trade by ascribing legitimacy to the shogunal government and by playing into the shogun's desire to create a worldview centered on a Japanese tributary state. The book reveals how formal and informal gift exchange also created a smooth working relationship between the Dutch and the Japanese bureaucracy, allowing the politically charged issue of foreign trade to proceed relatively uninterrupted for over two centuries.

Abe has inspired fierce loyalty among his followers. He has cowed Japan's left by pursuing an ambitious programme of reflation of the economy and strengthening the armed forces and national security establishment. And, on the international stage, he has staked a leadership role for Japan in Asia, a region being rapidly transformed by the rise of China and India. Abe's stature has only grown in the age of 'America First': he has both taken steps to preserve an ironclad relationship with the mercurial US president, and has himself become an undisputed leader of the besieged world order. In *The Iconoclast*, veteran Japan-watcher Tobias Harris tells the story of Abe's meteoric rise and stunning fall, his remarkable comeback, and his unlikely emergence as a global statesman struggling to lay the groundwork for Japan's survival in a turbulent century.

Morton, Robert

(Renaissance Books)

2020 : 06 288 p. Hardback 9781912961160 £65.00

Harry Parkes was at the heart of Britain's relations with the Far East from the start of his working life at fourteen, to his death at fifty-seven. Orphaned at the age of five, he went to China on his own as a child and worked his way to the top. God-fearing and fearless, he believed his mission was to bring trade and 'civilisation' to East Asia. In his day, he was seen as both a hero and a monster and is still bitterly resented in China for his part in the country's humiliations at Western hands, but largely esteemed in Japan for helping it to industrialise. Morton's new biography, the first in over thirty years, and benefiting in part from access to the Parkes' family and archives, offers a more intimate and informed profile of the personal and professional life of a Victorian titan and one of Britain's most undiplomatic diplomats in the history of the British Civil Service.

Land of Wondrous Cold tells a gripping story of the pioneering nineteenth-century voyages, when British, French, and American commanders raced to penetrate Antarctica's glacial rim for unknown lands beyond. These intrepid Victorian explorers - James Ross, Dumont D'Urville, and Charles Wilkes - laid the foundation for our current understanding of Terra Australis Incognita. Today, the white continent poses new challenges, as scientists race to uncover Earth's climate history, which is recorded in the south polar ice and ocean floor, and to monitor the increasing instability of the Antarctic ice cap, which threatens to inundate coastal cities worldwide. Interweaving the breakthrough research of the modern Ocean Drilling Program with the dramatic discovery tales of their Victorian forerunners, Gillen D'Arcy Wood describes Antarctica's role in a planetary drama of plate tectonics, climate change, and species evolution stretching back more than thirty million years.

Arnold diffusion, which concerns the appearance of chaos in classical mechanics, is one of the most important problems in the fields of dynamical systems and mathematical physics. Since it was discovered by Vladimir Arnold in 1963, it has attracted the efforts of some of the most prominent researchers in mathematics. The question is whether a typical perturbation of a particular system will result in chaotic or unstable dynamical phenomena. In this groundbreaking book, Vadim Kaloshin and Ke Zhang provide the first complete proof of Arnold diffusion, demonstrating that there is topological instability for typical perturbations of five-dimensional integrable systems (two-and-a-half degrees of freedom).

Berkeley Lectures on p-adic Geometry presents an important breakthrough in arithmetic geometry. In 2014, leading mathematician Peter Scholze delivered a series of lectures at the University of California, Berkeley, on new ideas in the theory of p-adic geometry. Building on his discovery of perfectoid spaces, Scholze introduced the concept of "diamonds," which are to perfectoid spaces what algebraic spaces are to schemes. The introduction of diamonds, along with the development of a mixed-characteristic shtuka, set the stage for a critical advance in the discipline. In this book, Peter Scholze and Jared Weinstein show that the moduli space of mixed-characteristic shtukas is a diamond, raising the possibility of using the cohomology of such spaces to attack the Langlands conjectures for a reductive group over a p-adic field.

Statistical Inference via Convex Optimization is an essential resource for optimization specialists who are new to statistics and its applications, and for data scientists who want to improve their optimization methods. Juditsky and Nemirovski provide the first systematic treatment of the statistical techniques that have arisen from advances in the theory of optimization. They focus on four well-known statistical problems - sparse recovery, hypothesis testing, and recovery from indirect observations of both signals and functions of signals - demonstrating how they can be solved more efficiently as convex optimization problems.
