L・M・モンゴメリ作品にみる子どもと子ども時代

Children and Childhoods in L.M. Montgomery: Continuing Conversations

Bode, Rita et al. (ed.)

(McGill-Queen's U.P.)

2022 : 10 352 p. Hardback 9780228013884 US\$140.00 Paperback 9780228013891 US\$39.95

One of contributors: 赤松佳子 : ノートルダム清心女子大学教授

Inspired by the responsive reading practices of L.M. Montgomery herself, those demonstrated by her characters, and those of her diverse readership, *Children and Childhoods in L.M. Montgomery* works with concepts of confluence, based on organic, non-linear readings of texts across time and space. Such readings reconsider views of childhood and children by challenging power hierarchies and inequities found in approaches that privilege more linear readings of literary influence.

ヨシコ・ウチダ著『写真花嫁』

Picture Bride: A Novel

Uchida, Yoshiko

Classics of Asian American Literature (U. of Washington Pr.)

2022 : 09 256 p. Paperback 9780295751122 US\$19.95

Seeking an escape from life in her small village in Japan, Hana Omiya arrives in California in 1917, one of thousands of Japanese "picture brides" whose arranged marriages brought them to the United States. When she finally sets foot on a pier in San Francisco, she is disappointed to meet her soon-to-be husband, the stoic Taro Takeda, who looks much older than in the photo his family had shared. Far from the fantasy life she dreamed up back home, Hana confronts emotional distance from her husband and hostility from white neighbors, eventually focusing her energy to support others in her tight-knit community. Showing the complexity of Issei life, Hana's story is intertwined with the stories of others: her best friend Kiku and Kiku's husband Henry, who reject demeaning city work to become farmers; Reverend Okada, a community leader who eventually decides to return to Japan; and Hana's daughter, Mary, who rejects her family and runs away with her boyfriend. Ultimately, as Japanese Americans are evacuated from their homes and imprisoned in concentration camps, we see how Hana and others cope with the heartache of losing everything they worked hard to build.

Cinema of Discontent: Representations of Japan's High-Speed Growth

Sasaki, Tomoyuki

SUNY series, Horizons of Cinema (State U. of New York)

2022 : 12 272 p. Hardback 9781438490991 US\$95.00

From the mid-1950s to the mid-1970s, Japan experienced an unprecedented level of economic growth, transforming itself from a war-devastated country to a global economic power. Our image of postwar Japan has been shaped by this event, and we tend to see its history as a story of great national success. *Cinema of Discontent* challenges this view and details the tensions generated by massive and intense capitalist development through analyses of popular cinema produced during the era of high-speed growth. The films discussed in this book, directed by Kawashima Yūzō, Masumura Yasuzō, Inoue Akira, Ezaki Mio, and Kumashiro Tatsumi, attracted broad audiences yet remain understudied. *Cinema of Discontent* contextualizes these films in relation to the politics, economy, intellectual discourse, and cultural texts of the time.

George Tsutakawa: Early Works on Paper

Martin, David F

Cascadia Art Museum (U. of Washington Pr.)

2022 : 11 128 p. 40 color, 40 b&w illus. Hardback 9780998911243 US\$29.95

One of the leading Northwest artists of his generation, George Tsutakawa (1910-97) is internationally known for his sculpture and fountain designs. However, a lesser-known aspect of his career was the production of blockprints, watercolors, and works on paper that began in the 1930s and continued throughout his career. Drawn from the Tsutakawa estate, most of the works shown here have never been seen previously by the public. These early works display concepts and inspirations that would inform Tsutakawa's aesthetic throughout a long and distinguished career. Contextual works by Tsutakawa's instructors and contemporaries provides a broader understanding of his oeuvre.

The Great Polarization: How Ideas, Power, and Policies Drive Inequality

Arnim, Rudiger von & Stiglitz, Joseph E. (ed.)

Initiative for Policy Dialogue at Columbia: Challenges in Development and Globalization (Columbia U.P.)

2022 : 12 400 p. Hardback 9780231199261 US\$70.00

The Great Polarization brings together scholars from disparate fields to examine the causes and consequences of this dramatic rise in inequality. Contributors demonstrate that institutions, norms, policy, and political power - not the "natural" operation of the market - determine the distribution of wealth and income. The book underscores the role of ideas and ideologies, showing how neoclassical economics and related beliefs have functioned in public debates to justify inequality. Together, these essays bear out an inescapable conclusion: inequality is a choice. The rules of the economy have been rewritten to favor those at the top, entrenching the imbalances of power that widen the gap between the very rich and everyone else.

The Market Power of Technology: Understanding the Second Gilded Age

Kurz, Mordecai

(Columbia U.P.)

2023 : 01 408 p. Hardback 9780231206525 US\$140.00 Paperback 9780231206532 US\$35.00

Mordecai Kurz develops a comprehensive integrated theory of the dynamics of market power and income inequality. He shows that technological innovations are not simply sources of growth and progress: they sow the seeds of market power. In a free market economy with intellectual property rights, firms' control over technology enables them to expand, attain monopoly power, and earn exorbitant profits. Competition among innovators does not eliminate market power because technological competition is different from standard competition; it results in only one or two winners. Kurz provides a pioneering analysis grounded on quantifying technological market power and its effects on inequality, innovation, and economic growth. He outlines what causes market power to rise and fall and details its macroeconomic and distributional consequences.

Unequal Cities: Overcoming Anti-Urban Bias to Reduce Inequality in the United States

McGahey, Richard

(Columbia U.P.)

2022 : 12 304 p. Hardback 9780231173346 US\$35.00

Economist Richard McGahey explores how cities can foster equitable economic growth despite the obstacles in their way. Drawing on economic and historical analysis as well as his extensive experience in government and philanthropy, he examines the failures of public policy and conventional economic wisdom that have led to the neglect of American cities and highlights opportunities for reform. *Unequal Cities* features detailed case studies of New York, Detroit, and Los Angeles, tracing how their attempts to achieve greater equity foundered because of the fiscal and political constraints imposed on them. McGahey identifies key lessons about the political coalitions that can overcome anti-urban biases, arguing that alliances among unions, environmentalists, and communities of color can help cities thrive. But he warns that cities cannot solve inequality on their own: political action at state and federal levels is necessary to achieve systemic change.

Leveraged: The New Economics of Debt and Financial Fragility

Schularick, Moritz (ed.)

(Univ. of Chicago Pr.)

2022 : 12 336 p. Hardback 9780226816937 ¥9,850

The 2008 financial crisis was a seismic event that laid bare how financial institutions' instabilities can have devastating effects on societies and economies. COVID-19 brought similar financial devastation at the beginning of 2020 and once more massive interventions by central banks were needed to head off the collapse of the financial system. All of which begs the question: why is our financial system so fragile and vulnerable that it needs government support so often? For a generation of economists who have risen to prominence since 2008, these events have defined not only how they view financial instability, but financial markets more broadly. *Leveraged* brings together these voices to take stock of what we have learned about the costs and causes of financial fragility and to offer a new canonical framework for understanding it.

2022 : 11 352 p. Hardback 9780231200585 US\$120.00 Paperback 9780231200592 US\$30.00

Years before he became renowned as one of the most original social scientists of the twentieth century, Albert O. Hirschman played an active role in the rebuilding of postwar Europe. Between 1946 and 1952, he worked as an economic analyst in the Research Division of the Federal Reserve Board of the United States, focusing on the reconstruction of Europe and the Marshall Plan. In that capacity, Hirschman wrote a number of reports about European economic policies, the first efforts at intra-European cooperation, and the uncertainties that surrounded the shaping of a new international economic order with the United States at its core. *The Postwar Economic Order* presents a collection of these interrelated reports, which offer incisive firsthand analysis of postwar Europe and give a behind-the-scenes view of American debates on European economic recovery.

2022 : 12 376 p. Hardback 9780231205160 US\$140.00 Paperback 9780231205177 US\$35.00

Certain cities - most famously New York, London, and Tokyo - have been identified as "global cities," whose function in the world economy transcends national borders. Without the same fanfare, formerly peripheral and secondary cities have been growing in importance, emerging as global cities in their own right. The striking similarity of the skylines of Dubai, Miami, and Singapore is no coincidence: despite following different historical paths, all three have achieved newfound prominence through parallel trends. In this groundbreaking book, Alejandro Portes and Ariel C. Armony demonstrate how the rapid and unexpected rise of these three cities recasts global urban studies.

Not long ago it seemed flood control experts were close to mastering the unruly flows funnelling toward Hudson Bay and the Prairie city of Winnipeg. But as more intense and out-of-synch flood events occur, wary cities like Winnipeg continue to depend on systems and specifications that will soon be out of date. Rivers have impulses that defy many of the basic human assumptions underpinning otherwise sophisticated technologies. This is the river-city expression of climate change. In *Just One Rain Away* Stephanie Kane shows how geoscience, engineering, and law converge to affect flood control in Winnipeg.

Rumbles of Thunder: Power Shifts and the Danger of Sino-American War

Chan, Steve

(Columbia U.P.)

2022 : 12 344 p. Hardback 9780231208444 US\$130.00 Paperback 9780231208451 US\$32.00

It is widely believed that shifts in the balance of power between an established hegemon and a rising upstart can lead to war. To what extent does this proposition hold true for Sino-American relations today? Steve Chan examines a range of international relations theories and popular narratives that suggest an elevated risk of confrontation between the two powers. Probing the recent deterioration in Sino-American relations, he considers whether several factors that can raise or lower international tension apply to the current situation. Chan demonstrates that power shifts do not preordain violent outcomes - nor does their absence ensure peace. Criticizing overly mechanistic frameworks, he emphasizes that domestic politics, international political economy, and the choices of individual leaders are all crucial to understanding why wars happen.

Kastner, Scott L.

Contemporary Asia in the World (Columbia U.P.)

2022 : 11 272 p. Hardback 9780231198646 US\$120.00 Paperback 9780231198653 US\$30.00

Scott L. Kastner offers a comprehensive analytical account of PRC-Taiwan relations that sheds new light on the prospects for cross-strait military conflict. He examines several key regional trends that have complex implications for stability, including deepening economic integration, the shifting balance of military power, uncertainty about the future of U.S. commitment, and domestic political changes in both the PRC and Taiwan. Kastner argues that the risks of conflict are real but should not be exaggerated. Several distinct pathways could lead to the breakout of hostilities, and the mechanisms that might allay one type of conflict do not necessarily apply to others - yet war is anything but inevitable. Although changes to the balance of power introduce risks, powerful mitigating factors remain in place and there are plausible steps to reduce the likelihood of military conflict.

The proliferation of sanctions spurs efforts to evade them, as states and firms seek ways to circumvent U.S. penalties. This is only part of the story. Sanctions also reshape relations between countries, pushing governments that are at odds with the U.S. closer to each other - or, increasingly, to Russia and China.

2022 : 11 144 p. Hardback 9780231208284 US\$80.00 Paperback 9780231208291 US\$17.95

Judith Butler shows how COVID-19 and all its consequences - political, social, ecological, economic - have challenged us to reconsider the sense of the world that such disasters bring about. Drawing on the work of Max Scheler, Maurice Merleau-Ponty, and critical feminist phenomenology, Butler illuminates the conditions in which we seek to make sense of our disorientation, precarity, and social bonds. *What World Is This?* offers a new account of interdependency in which touching and breathing, capacities that amid a viral outbreak can threaten life itself, challenge the boundaries of the body and selfhood. Criticizing notions of unlimited personal liberty and the killing forces of racism, sexism, and classism, this book suggests that the pandemic illuminates the potential of shared vulnerabilities as well as the injustice of pervasive inequalities.

Conjuring the Buddha offers a history of early tantric Buddhist ritual through the lens of the Tibetan manuscripts discovered near Dunhuang on the ancient Silk Road. Jacob P. Dalton argues that the spread of ritual manuals offered Buddhists an extracanonical literary form through which to engage with their tradition in new and locally specific ways. He suggests that ritual manuals were the literary precursors to the tantras, crucial to the emergence of esoteric Buddhism. Examining a series of ninth- and tenth-century tantric manuals from Dunhuang, Dalton uncovers lost moments in the development of rituals such as consecration, possession, sexual yoga, the Great Perfection, and the subtle body practices of the winds and channels.

What, if anything, is Esoteric Pure Land Buddhism? In 1224, the medieval Japanese scholar-monk Dōhan (1179-1252) composed *The Compendium on Esoteric Mindfulness of Buddha (Himitsu nenbutsu shō)*, which begins with another seemingly simple question: Why is it that practitioners of mantra and meditation rely on the recitation of the name of the Buddha Amitābha? To answer this question, Dōhan explored diverse areas of study spanning the whole of the East Asian Mahayana Buddhist tradition. Although contemporary scholars often study Esoteric Buddhism and Pure Land Buddhism as if they were mutually exclusive, diametrically opposed, schools of Buddhism, in the present volume Aaron Proffitt examines Dōhan's *Compendium* in the context of the eastward flow of Mahayana Buddhism from India to Japan and uncovers Mahayana Buddhists employing multiple, overlapping, so-called esoteric approaches along the path to awakening.

Southeast China is a traditional stronghold of Buddhism, but little scholarly attention has been paid to this fact. Brian Nichols's pioneering book, *Lotus Blossoms and Purple Clouds*, centers on a large Buddhist monastery in Quanzhou and combines ethnographic detail with stimulating analysis to examine religion in post-Mao China. Nichols conducted more than twenty-six months of field research over a fourteen-year period (2005-2019) to develop a re-description of Chinese monastic Buddhism that reaches beyond canonical sources and master narratives to local texts, material culture, oral history, and living traditions. His work decenters normative accounts and sheds light on how Buddhism is lived and practiced.

Modern Japanese Buddhist monks of all denominations differ from those in other Asian countries because they frequently marry, drink alcohol, and eat meat. This has caused Buddhist scholars and practitioners generally to assume that early Japanese monastics had little interest in precepts and ordinations. Some medieval Japanese exegetes, however, were obsessively concerned with these topics as they strove to understand what it meant to be a Buddhist. This landmark collection of essays by Paul Groner, one of the leading authorities on Tendai Buddhism, examines the medieval Tendai School, which dominated Japanese Buddhism at that time, to uncover the differences in understanding and interpreting monastic precepts and ordinations.

(Columbia U.P.)

2022 : 10 304 p. Hardback 9780231206082 US\$120.00

In the early fifteenth century, two Tibetan monks debated how to transform the body ritually into a celestial palace inhabited by buddhas. The discussion between Ngorchon Kunga Zangpo and Khédrujé Gélek Pelzangpo concerned the mechanics of this tantric ritual practice, known as body mandala, as well as the most reliable sources to follow in performing it. As representatives of the Sakya and emerging Geluk traditions respectively, these authors spoke for communities of Buddhist practitioners vying for patronage and prestige in an evolving Tibetan scholastic culture. Their debate witnessed clashes between imagination and deception, continuity and rupture, and tradition and innovation. *Searching for the Body* demonstrates the significance of the body mandala debate for understandings of Tibetan Buddhism as well as conversations on representation and embodiment occurring across the disciplines today.

Many biographies of the Buddha have been published in the last 150 years, and all claim to describe the authentic life of the historical Buddha. This book, written by one of the leading scholars of Buddhism and Japanese religion, starts from the opposite assumption and argues that we do not yet possess the archival and archeological materials required to compose such a biography: All we have are narratives, not facts. Yet traditional biographies have neglected the literary, mythological, and ritual elements in the life of the Buddha. Bernard Faure aims to bridge this gap and shed light on a Buddha that is not historical but has constituted a paradigm of practice and been an object of faith for 2,500 years.

Zen Conquests: Buddhist Transformations in Contemporary Vietnam

Soucy, Alexander

(Univ. of Hawaii Pr.)

2022 : 07 256 p. Hardback 9780824889982 US\$68.00

At the tail end of the twentieth century, a monk transformed a small village temple on the outskirts of Hanoi into a monastery and meditation center called Thiền Viện Sùng Phúc—a place where monastics and lay Buddhists could learn and practice Zen meditation. In time the original temple was replaced by numerous large buildings to accommodate meditation sessions, youth events, weddings, classes, and a variety of other activities designed to keep practitioners engaged. Thiền Viện Sùng Phúc's approach to Buddhism as a life commitment for all ages and genders has been very successful, attracting more than a thousand Buddhists to its weekly services. It joined Thiền phái Trúc Lâm, a much larger organization started by Thích Thanh Từ in southern Vietnam that has expanded to northern Vietnam and internationally. In *Zen Conquests*, Alexander Soucy presents not only the first ethnography of Thiền Viện Sùng Phúc and its followers, but also a compelling look at how the discourses of Buddhist Modernism were incorporated at a local level into this new space on the outskirts of Hanoi and how and why new constituencies of followers are drawn to Zen Buddhism in contemporary Vietnam.

17世紀京都の年中行事

A Year in Seventeenth-Century Kyoto: Edo-Period Writings on Annual Ceremonies, Festivals, and Customs

Groemer, Gerald

(Univ. of Hawaii Pr.)

2022 : 10 384 p. Hardback 9780824892975 US\$68.00

Before the twentieth century, Japanese religious and cultural life was shaped by a variety of yearly ceremonies, festivals, and customs. These annual events (nenju gyoji) included Shinto festivals in which participants danced through the night to boisterous music and Buddhist temple practices that honored deities, great priests, or temple founders with solemn rituals and prayers - and sometimes, when the Buddha was invoked, raucous dancing. Temples also hosted popular fairs, where holy objects and artwork were displayed to the faithful and curious. Countless other celebrations were held annually at the residences of the nobility and military elite and at commoner domiciles. Kyoto, the imperial - and cultural - capital since the eighth century, was the center of many of these events. From Kyoto festivals, rituals, and celebrations diffused to other parts of the land, ultimately shaping religious, artistic, and everyday life as a whole. By the seventeenth century the Kyoto public wished to inform itself more accurately about nenju gyoji and their dates and meanings. As a result, a growing number of guidebooks and almanacs were written and published for the urban populace.

日本政府と政治

Japanese Government and Politics

McKee, Lauren

(Assoc. Asian Studies)

2022 : 12 132 p. Paperback 9781952636356 US\$15.00

This volume takes a comparative approach to Japanese politics, covering topics such as political parties and elections, civil society, bureaucracy, and foreign relations. Grounded in a discussion of democracy's historical development since the Meiji period, each chapter encourages readers to think critically and comparatively about political processes and their outcomes, situating Japan regionally and as a wealthy, democratic nation. The goal is to offer students of government insight into how democracy works - and doesn't, for that matter - and can illustrate the fact that strengthening democratic institutions is an ongoing struggle throughout much of the world, including Japan.

2022 : 11 320 p. Hardback 9781469671499 US\$99.00 Paperback 9781469671505 US\$34.95

Two decades punctuated by the financial crisis of the Great Recession and the public health crisis of COVID-19 have powerfully reshaped housing in America. By integrating social, economic, intellectual, and cultural histories, this illuminating work shows how powerful forces have both reflected and catalyzed shifts in the way Americans conceptualize what a house is for, in an era that has laid bare the larger structures and inequities of the economy.

COVID-19: 疫病史

COVID-19: A History

Duffin, Jacalyn

Canadian Essentials (McGill-Queen's U.P.)

2022 : 10 232 p. Hardback 9780228014119 US\$27.95

Duffin describes the frightening appearance of the virus and its identification by scientists in China; subsequent outbreaks on cruise ships; the relentless spread to Europe, the Americas, Africa, and elsewhere; and the immediate attempts to confront it. COVID-19 next explores the scientific history of infections generally, and the discovery of coronaviruses in particular. Taking a broad approach, the book explains the advent of tests, treatments, and vaccines, as well as the practical politics behind interventions, including quarantines, barrier technologies, lockdowns, and social and financial supports.

The Cultivated Forest: People and Woodlands in Asian History

Miller, Ian M. et al. (ed.)

(U. of Washington Pr.)

2022 : 11 274 p. Hardback 9780295751320 US\$99.00 Paperback 9780295750903 US\$30.00

Forests have histories that need to be told. This examination of wood and woodlands in East and Southeast Asia brings together case studies from China, Japan, Korea, Taiwan, and Sumatra to explore continuities in the history of forest management across these regions as well as the distinctive qualities of human-forest relations within each context. With a general introduction to forest histories in East and Southeast Asia and a multidisciplinary set of authors, *The Cultivated Forest* constructs alternative lineages of forest knowledge that aim to transcend the frameworks imposed by colonial or national histories. Across these regions, forests were sites of exploitation, contestation, and ritual just as they were in Europe and America. This volume puts studies of Asian forests into conversation with global forest histories.

Greenhouse Planet: How Rising CO2 Changes Plants and Life as We Know It

Ziska, Lewis H.

(Columbia U.P.)

2022 : 09 240 p. Hardback 9780231206709 US\$25.00

Greenhouse Planet reveals the stakes of increased CO2 for plants, people, and ecosystems - from crop yields to seasonal allergies and from wildfires to biodiversity. The veteran plant biologist Lewis H. Ziska describes the importance of plants for food, medicine, and culture and explores the complex ways higher CO2 concentrations alter the systems on which humanity relies. He explains the science of how increased CO2 affects various plant species and addresses the politicization and disinformation surrounding these facts.
