## Take Arms Against a Sea of Troubles: The Power of the Reader's Mind over a Universe of Death

Bloom, Harold

(Yale U.P.)

2020 : 11 672 p. Hardback 9780300247282 US\$35.00

This dazzling celebration of the power of poetry to sublimate death - completed weeks before Harold Bloom died - shows how literature renews life amid what Milton called "a universe of death." Bloom reads as a way of taking arms against the sea of life's troubles, taking readers on a grand tour of the poetic voices that have haunted him through a lifetime of reading. "High literature," he writes, "is a saving lie against time, loss of individuality, premature death." In passages of breathtaking intimacy, we see him awake late at night, reciting lines from Dante, Shakespeare, Milton, Montaigne, Blake, Wordsworth, Hart Crane, Jay Wright, and many others. He feels himself "edged by nothingness," uncomprehending, but still sustained by reading. Generous and clear-eyed, this is among Harold Bloom's most ambitious and most moving books.

## Tragedy

Eagleton, Terry

(Yale U.P.)

2020 : 08 216 p. Hardback 9780300252217 US\$26.00

In this compelling account, eminent literary critic Terry Eagleton explores the nuances of tragedy in Western culture - from literature and politics to philosophy and theater. Eagleton covers a vast array of thinkers and practitioners, including Nietzsche, Walter Benjamin, and Slavoj Žižek, as well as key figures in theater, from Sophocles and Aeschylus to Shakespeare and Ibsen. Eagleton examines the political nature of tragedy, looking closely at its connection with periods of historical transition. The dramatic form originated not as a meditation on the human condition, but at moments of political engagement, when civilizations struggled with the conflicts that beset them. *Tragedy*, Eagleton demonstrates, is fundamental to human experience and culture.

## Asian Interventions in Global Shakespeare: 'All the World's His Stage'

Trivedi, Poonam et al. (ed.)

(Routledge)

2020 : 11 250 p. Hardback 9780367615154 £120.00 Paperback 9780367615192 £29.99

This volume critically analyses and theorises Asian interventions in the expanding phenomenon of Global Shakespeare. It interrogates Shakespeare's 'universality' from Asian perspectives: how this has been modified or even replaced by the 'global bard' as a recognisable brand, and how Asian Shakespeares have contributed to or subverted this process by both facilitating the worldwide dissemination of the bard's plays and challenging and resisting the very templates through which they become globally legible. Critically acclaimed Asian productions have prominently figured at premier Western festivals, and popular Asian appropriations like Bollywood, manga and anime have created new kinds of globally accessible Shakespeare.

### Japanese Politeness: An Enquiry

Obana, Yasuko

(Routledge)

2020 : 10 202 p. Hardback 9780367280604 £120.00

By examining how far previous assumptions can apply to Japanese, Obana exposes a variety of characteristics of Japanese politeness. By taking a diachronic approach, she probes into what constitutes politeness, extracts key elements of the term 'polite' in Japanese, and demonstrates how modern honorifics' apparent diverse, divergent uses and effects can be integrated into a systematic matrix. Furthermore, by quoting traditional Japanese language scholars' (kokugo gakusha) studies, Obana brings different views into the open. She also carves out politeness strategies in Japanese that have not been adequately explored to date, and which often conform to the way in which honorifics behave because they reflect social indexicality.

Scholar, Richard

(Princeton U.P.)

2020 : 08 256 p. Hardback 9780691190327 ¥3,860

English has borrowed more words from French than from any other modern foreign language. French words and phrases - such as *sà la mode*, *ennui*, *naïveté* and *caprice* - lend English a certain *je-ne-sais-quoi* that would otherwise elude the language. Richard Scholar examines the continuing history of untranslated French words in English and asks what these words reveal about the fertile but fraught relationship that England and France have long shared and that now entangles English- and French-speaking cultures all over the world.

2020 : 11 254 p. Hardback 9780367619046 £120.00 Paperback 9780367619022 £29.99

This book's brief is both theoretical and practical: on the theoretical side, it aims to provide a systematic, corpus-based account of current academic usage in English and in German as well as of the translation problems associated with various academic genres; on the practical side, it seeks to equip academic translators with the skills required to produce target-language text in accordance with disciplinary conventions. The main perspective taken is that of a translator working from German into English, but the converse direction is also regularly taken into account. Most of the examples used are based on errors that occurred in real-life translation jobs. In 1799, a French Army officer was rebuilding the defenses of a fort on the banks of the Nile when he discovered an ancient stele fragment bearing a decree inscribed in three different scripts. So begins one of the most familiar tales in Egyptology - that of the Rosetta Stone and the decipherment of Egyptian hieroglyphs. This book draws on fresh archival evidence to provide a major new account of how the English polymath Thomas Young and the French philologist Jean-François Champollion vied to be the first to solve the riddle of the Rosetta.

This book provides perspectives on depopulated areas and regional social capital from positivistic field surveys. Among the developed countries of the world, Japan has a very small amount of national land, with almost 70% of it being in mountainous locations. Concentration of populations and economic capital into large metropolitan areas along with many depopulated and population-aged regions in the mountainous parts can be seen in the country. A very clear regional disparity has arisen in Japan, especially since the era of its high economic growth.

### **Overtourism and Tourism Education: A Strategy for Sustainable Tourism Futures**

*Contemporary Geographies of Leisure, Tourism and Mobility* (Routledge)

2020 : 11 210 p. Hardback 9780367468842 £120.00

The recent global COVID-19 pandemic was expected to halt travel and, arguably, overtourism. However, industry experts and researchers share the opinion that instead of declining, overtourism is simply experiencing a shift, with a swarm of 'second home' and domestic travel that is likely to engulf many tourism destinations. Against this backdrop, the issue of overtourism remains relevant and studies on ways to cultivate responsible consumer mindsets to deal with overtourism and other sustainability issues in the tourism industry are called for. This book focuses on education as a transformative and strategic tool to tackle overtourism and related negative impacts. It presents original research on the topics of overtourism, education, and sustainability, and puts forward a range of practical and transformative tourism education strategies to mitigate overtourism and to promote the sustainable development of destinations.

Subacchi, Paola

(Yale U.P.)

2020 : 07 320 p. Hardback 9780300244045 US\$30.00

When it comes to the afflictions of the global economy, almost everyone - and especially Donald Trump - is quick to point the finger of blame at the state of international trade. But what about unconstrained capital flows? Unfettered capital has resulted in a string of financial and economic crises that have left our political systems strained and dialogue corroded. The once perceived benefits of openness have been cast to the wayside and the cracks in the global order can no longer be ignored. Paola Subacchi argues that international cooperation and interdependence have become crippled. Regional restrictions will soon strengthen and a multipolar order will take shape, leading to a distinctly transformed economic landscape in which China challenges the dominance of the US dollar. Combining history, analysis, and prediction, this book provides penetrating insight into the challenges facing the international economic order.

The Chinese economy is one of the most important in the world, and its success is driven in large part by its financial system. Though closely scrutinized, this system is poorly understood and vastly different than those in the West. *The Handbook of China's Financial System* will serve as a standard reference guide and invaluable resource to the workings of this critical institution. The handbook looks in depth at the central aspects of the system, including banking, bonds, the stock market, asset management, the pension system, and financial technology. Each chapter is written by leading experts in the field, and the contributors represent a unique mix of scholars and policymakers, many with firsthand knowledge of setting and carrying out Chinese financial policy. The first authoritative volume on China's financial system, this handbook sheds new light on how it developed, how it works, and the prospects and direction of significant reforms to come.

2013年ビル・ゲイツが選ぶお薦め本に選ばれた *The Box* の著者の待望の新刊

Marc Levinson, the acclaimed author of *The Box*, tells the story of globalization through the people who eliminated barriers and pursued new ways of doing business. He shows how the nature of globalization changed dramatically in the 1980s with the creation of long-distance value chains. This new type of economic relationship shifted manufacturing to Asia, destroying millions of jobs and devastating industrial centers in North America, Europe, and Japan. Levinson describes how improvements in transportation, communications, and computing made international value chains possible, but how globalization was taken too far because of large government subsidies and the systematic misjudgment of risk by businesses. As companies began to account properly for the risks of globalization, cross-border investment fell sharply and foreign trade lagged long before Donald Trump became president and the coronavirus disrupted business around the world.

*Sensory Studies* (Routledge)

2020 : 11 98 p. Hardback 9781350090590 £120.00

This book takes the reader on a sensory ethnographic tour in Japan and describes the many ways sounds seep into everyday experiences. So many ethnographies describe local worlds with a deep attention to what is seen and what people say, but with a limited understanding of the broader sonic environments that enrich and inform everyday life. Through a focus on sounds, both real and imagined, the volume employs a critical ear to engage with a range of sonically enriched encounters, including crosswalk melodies in streetscapes, announcements and jingles at train stations, water features in gardens, dosimeters in nuclear affected zones, sounds of training in music and martial arts halls and celebrations under blossoming cherry trees. The authors use various analytic frames to understand the communicative and symbolic aspects of sounds and to sense the layers of historical meaning, embodied action and affect associated with sonic environments.

Although scholars have emphasized the importance of women's networks for civil society in twentieth-century Japan, *Women and Networks in Nineteenth-Century Japan* is the first book to tackle the subject for the contentious and consequential nineteenth century. The essays traverse the divide when Japan started transforming itself from a decentralized to a centralized government, from legally imposed restrictions on movement to the breakdown of travel barriers, and from ad hoc schooling to compulsory elementary school education. As these essays suggest, such changes had a profound impact on women and their roles in networks. Rather than pursue a common methodology, the authors take diverse approaches to this topic that open up fruitful avenues for further exploration.

This timely study looks behind the headlines and the statistics to demonstrate the value for knowledge exchange and policy learning of comparisons that are founded on an in-depth understanding of key socio-demographic and public health indicators within their policy settings. The book adopts innovative, integrated, multi-disciplinary international perspectives to track and assess a fast-moving topical subject in an accessible format. ### Gradual Institutional Change in Japan: Kantei Leadership under the Abe Administration

Zakowski, Karol

*Nissan Institute/Routledge Japanese Studies* (Routledge)

2021 : 01 240 p. Hardback 9780367623364 £120.00

Chapters offer multi-dimensional explanations for the preconditions of successful gradual institutional change in political systems, characterized by relatively strong veto players, rigid governmental structures, and numerous unofficial decision-making rules. It is argued that enhancement of the prime minister's position was implemented through the creative use of pre-existing policy venues, coupled with minor institutional changes in decision-making bodies. Using three illustrated case studies, it is demonstrated how the prime minister managed to centralize the decision-making process: a result of strategic appointment of ministers, empowerment of the Cabinet Secretariat and also taking advantage of wider advisory organs, largely circumventing deliberations on key policies in the ruling party. Seemingly minor changes thus manifested in a major redefinition of decision-making patterns: a result of the long-term perspective of the Abe administration.

Landemore, Helene

(Princeton U.P.)

To the ancient Greeks, democracy meant gathering in public and debating laws set by a randomly selected assembly of several hundred citizens. To the Icelandic Vikings, democracy meant meeting every summer in a field to discuss issues until consensus was reached. Our contemporary representative democracies are very different. Modern parliaments are gated and guarded, and it seems as if only certain people - with the right suit, accent, wealth, and connections - are welcome. Diagnosing what is wrong with representative government and aiming to recover some of the lost openness of ancient democracies, *Open Democracy* presents a new paradigm of democracy in which power is genuinely accessible to ordinary citizens.

Hale, Kathleen & Brown, Mitchell

*Public Management and Change* (Georgetown U.P.)

2020 : 06 320 p. Hardback 9781626167780 US\$34.95

In *How We Vote*, Kathleen Hale and Mitchell Brown explore what is at the heart of our democracy: how elections are run. Election administration determines how ballots are cast and counted, and how jurisdictions try to innovate while also protecting the security of the voting process, as well as how election officials work. Election officials must work in a difficult intergovernmental environment of constant change and intense partisanship. Voting practices and funding vary from state to state, and multiple government agencies, the judicial system, voting equipment vendors, nonprofit groups, and citizen activists also influence practices and limit change. Despite real challenges and pessimistic media assessments, Hale and Brown demonstrate that election officials are largely successful in their work to facilitate, protect, and evolve the voting process.

Since the Revolutionary War, the United States has entered into dozens of alliances with international powers to protect its assets and advance its security interests. *America's Entangling Alliances* offers a corrective to long-held assumptions about US foreign policy and is relevant to current public and academic debates about the costs and benefits of America's allies.

**Military Thought of Asia: From the Bronze Age to the Information Age**

Roy, Kaushik

*Warfare and History* (Routledge)

2020 : 11 278 p. Hardback 9780367360177 £120.00 Paperback 9780367360184 £34.99

The volume takes a transcontinental and comparative approach to provide a broad overview of the evolution of military thought in Asia. The military traditions and theories which have emerged in different parts of Eurasia throughout history are products of geopolitics and unique to the different regions. The book considers the systematic and tight representation of ideas by famous figures including Kautlya and Sun Tzu. At the same time, it also highlights publications on military affairs by small men like mid-ranking officers and scattered ideas regarding the origin, nature and societal impact of organised violence present in miscellaneous sources like coins, inscriptions, paintings and fictional literature. In so doing, the book fills a historiographical gap in scholarship on military thought, which marginalises Asia to the part of cameo, and historicises the evolution of theory and the praxis of warfare.

### **The President Who Would Not Be King: Executive Power under the Constitution**

McConnell, Michael W.

*The University Center for Human Values* (Princeton U.P.)

2020 : 11 432 p. Hardback 9780691207520 ¥4,520

Michael McConnell provides a comprehensive account of the drafting of presidential powers. Because the framers met behind closed doors and left no records of their deliberations, close attention must be given to their successive drafts. McConnell shows how the framers worked from a mental list of the powers of the British monarch, and consciously decided which powers to strip from the presidency to avoid tyranny. He examines each of these powers in turn, explaining how they were understood at the time of the founding, and goes on to provide a framework for evaluating separation of powers claims, distinguishing between powers that are subject to congressional control and those in which the president has full discretion.

*Perspectives in Law, Business and Innovation* (Springer)

2021 : 01 202 p. Hardback 9789811592546 EUR129.99

In this volume, the authors form a multidisciplinary team of experts to discuss some of the reasons behind this delay. The focus is on three areas: business, technology, and law. The authors discuss how the traditional car manufacturers have to devote numerous resources to the development of a new business model, in which the sole manufacturing of vehicles may no longer be sufficient. In addition, the book seeks to introduce how technological challenges are creating a shift toward connected autonomous vehicles. Further, it provides insight into how regulators are responding to the insufficiently tested technology and how lawyers try to answer the liability question for accidents with these autonomous vehicles.

This handbook presents the conceptions and principles central to every aspect of Hegel's systematic philosophy. In twenty-eight thematically linked chapters by leading international experts, *The Palgrave Hegel Handbook* provides reliable, scholarly overviews of each subject, illuminates the main issues and debates, and details concisely the considered views of each contributor. Recent scholarship challenges traditional, largely anti-Kantian, readings of Hegel, focusing instead on Hegel's appropriation of Kantian epistemology to reconcile idealism with the rejection of foundationalism, coherentism and skepticism.

### How to Give: An Ancient Guide to Giving and Receiving

Seneca / Romm, James S. (ed. & trans.)

*Ancient Wisdom for Modern Readers* (Princeton U.P.)

2020 : 10 288 p. Hardback 9780691192093 ¥2,190

To give and receive well may be the most human thing you can do - but it is also the closest you can come to divinity. So argues the great Roman Stoic thinker Seneca (c. 4 BCE-65 CE) in his longest and most searching moral treatise, "On Benefits" (*De Beneficiis*). James Romm's splendid new translation of essential selections from this work conveys the heart of Seneca's argument that generosity and gratitude are among the most important of all virtues. For Seneca, the impulse to give to others lies at the very foundation of society; without it, we are helpless creatures, worse than wild beasts. But generosity did not arise randomly or by chance. Seneca sees it as part of our desire to emulate the gods, whose creation of the earth and heavens stands as the greatest gift of all. Seneca's soaring prose captures his wonder at that gift, and expresses a profound sense of gratitude that will inspire today's readers.

### How to Be Content: An Ancient Poet's Guide for an Age of Excess

Horace & Harrison, Stephen

*Ancient Wisdom for Modern Readers* (Princeton U.P.)

2020 : 10 256 p. Hardback 9780691182520 ¥2,190

What are the secrets to a contented life? One of Rome's greatest and most influential poets, Horace (65-8 BCE) has been cherished by readers for more than two thousand years not only for his wit, style, and reflections on Roman society, but also for his wisdom about how to live a good life - above all else, a life of contentment in a world of materialistic excess and personal pressures. In *How to Be Content*, Stephen Harrison, a leading authority on the poet, provides fresh, contemporary translations of poems from across Horace's works that continue to offer important lessons about the good life, friendship, love, and death.

In *A World of Inequalities: Christian and Muslim Perspectives*, fourteen leading Christian and Muslim scholars respond to the global crisis of inequality by demanding and modeling interreligious dialogue. This volume takes an intersectional approach, examining aspects of global inequality including gender, race and ethnicity, caste and social class, economic and sociopolitical disparities, and slavery. Essays explore the roots of these realities, how they are treated in Christian and Muslim traditions and texts, and how the two faiths can work together to address inequality.

### Edward the Confessor: Last of the Royal Blood

Licence, Tom

*The English Monarchs Series* (Yale U.P.)

Tom Licence navigates the contemporary webs of political deceit to present a strikingly different Edward. He was a compassionate man and conscientious ruler, whose reign marked an interval of peace and prosperity between periods of strife. More than any monarch before, he exploited the mystique of royalty to capture the hearts of his subjects. This compelling biography provides a much-needed reassessment of Edward's reign - calling into doubt the legitimacy of his successors and rewriting the ending of Anglo-Saxon England.

The volume's chapters are representative of the growth in North Korean studies that has occurred since the 1990s, in parallel with the growing maturity of the field in South Korea, as well as with far greater levels of access to North Korean sources. The volume is divided into five Parts, each reflecting an emergent area of debate and research: The political perspective / The North Korean economy / Foreign relations / Society / Culture. This is the first anthology of North Korean studies to demonstrate a clear understanding of North Korea as North Korea, as opposed to a dimly perceived and threatening rogue state. It features both Korean and non-Korean contributors, many working from primary source material.

(British Columbia UP)

Despite the enduring importance of the occupation to world history and historical memory in East Asia, *Translating the Occupation* is the first English-language volume to provide such a diverse selection of important primary sources from this period for both scholars and students. Contributors from six different countries have translated sources from Chinese, Japanese, and Korean on a wide range of subjects, focusing on writers who have long been considered problematic or outright traitorous. Each text is accompanied by a short essay to contextualize the translation and explain its significance. This volume offers a practical, accessible sourcebook from which to challenge standard narratives. The texts have been carefully selected to deepen our understanding of the myriad tensions, transformations, and continuities in Chinese wartime society. *Translating the Occupation* reasserts the centrality of the occupation to twentieth-century Chinese history and opens the door further to much-needed analysis.

## Chimpanzee Culture Wars: Rethinking Human Nature alongside Japanese, European, and American Cultural Primatologists

2020 : 09 352 p. Hardback 9780691204277 ¥12,260 Paperback 9780691204284 ¥3,480

In the 1950s, Japanese zoologists took note when a number of macaques invented and passed on new food-washing behaviors within their troop. The discovery opened the door to a startling question: Could animals other than humans share social knowledge - and thus possess culture? The subsequent debate has rocked the scientific world, pitting cultural anthropologists against evolutionary anthropologists, field biologists against experimental psychologists, and scholars from Asia against their colleagues in Europe and North America. In *Chimpanzee Culture Wars*, the first ethnographic account of the battle, anthropologist Nicolas Langlitz presents first-hand observations gleaned from months spent among primatologists on different sides of the controversy.

Surgery theory, a subfield of geometric topology, is the study of the classifications of manifolds. *A Course on Surgery Theory* offers a modern look at this important mathematical discipline and some of its applications. In this book, Stanley Chang and Shmuel Weinberger explain some of the triumphs of surgery theory during the past three decades, from both an algebraic and geometric point of view. They also provide an extensive treatment of basic ideas, main theorems, active applications, and recent literature. The authors methodically cover all aspects of surgery theory, connecting it to other relevant areas of mathematics, including geometry, homotopy theory, analysis, and algebra. Later chapters are self-contained, so readers can study them directly based on topic interest.

This monograph on the applications of cube complexes constitutes a breakthrough in the fields of geometric group theory and 3-manifold topology. Many fundamental new ideas and methodologies are presented here for the first time, including a cubical small-cancellation theory that generalizes ideas from the 1960s, a version of Dehn Filling that functions in the category of special cube complexes, and a variety of results about right-angled Artin groups. The book culminates by establishing a remarkable theorem about the nature of hyperbolic groups that are constructible as amalgams.
