### English Pronunciation Teaching: Theory, Practice and Research Findings

Sardegna, Veronica G. & Jarosz, Anna (ed.)

*Second Language Acquisition* (Multilingual Matters)

2023 : 03 272 p. Hardback 9781800410497 ￡119.95 Paperback 9781800410480 ￡39.95

This book presents and discusses theoretical and practical perspectives on English pronunciation theory, research and practice in order to establish evidence-based pronunciation teaching models, teaching and research priorities, and recommendations for best practices in teaching English pronunciation. The chapters provide a balanced view of theory and practice based on the authors' empirical findings and their extensive professional experiences in English as a second/foreign language (ESL/EFL) and lingua franca contexts.

### The Handbook of Usage-Based Linguistics

Diaz-Campos, Manuel & Balasch, Sonia (eds.)

*Blackwell Handbooks in Linguistics* (Wiley-Blackwell)

2023 : 07 630 p. Hardback 9781119839828 US\$185.00

Over the past three decades, usage-based theories of language development and acquisition have challenged long-held beliefs about language, particularly the concept of universal grammar. Usage-based research in linguistics - with data derived from interdisciplinary studies in sociolinguistics, historical linguistics, experimental linguistics, corpus linguistics, psycholinguistics, and other subfields - indicates that grammar and usage are intricately connected. *The Handbook of Usage-Based Linguistics* is the first volume of its kind to offer a comprehensive, authoritative, and interdisciplinary view of the application of usage-based theory to linguistics and language study.

### What It All Means: Semantics for (Almost) Everything

Schlenker, Philippe

(MIT Pr.)

2022 : 11 520 p. Hardback 9780262047432 US\$29.95

"It's just semantics" is often said dismissively. But Schlenker shows that semantics - the study of meaning - is an unsung success of modern linguistics, a way to investigate some of the deepest questions about human nature using tools from the empirical and formal sciences. Drawing on fifty years of research in formal semantics, Schlenker traces how meaning comes to life. After investigating meaning in primate communication, he explores how human meanings are built, using in some cases sign languages as a guide to the workings of our inner "logic machine." Schlenker explores how these meanings can be enriched by iconicity in sign language and by gestures in spoken language, and then turns to more abstract forms of iconicity to understand the meaning of music. He concludes by examining paradoxes, which - being neither true nor false - test the very limits of meaning.

### Structure

Lasnik, Howard & Uriagereka, Juan

(MIT Pr.)

2022 : 12 248 p. Paperback 9780262544542 US\$45.00

Howard Lasnik and Juan Uriagereka “were there” when generative grammar was being developed into the Minimalist Program. In this presentation of the universal aspects of human language as a cognitive phenomenon, they rationally reconstruct syntactic structure. In the process, they touch upon structure dependency and its consequences for learnability, nuanced arguments (including global ones) for structure presupposed in standard linguistic analyses, and a formalism to capture long-range correlations. For practitioners, the authors assess whether “all we need is Merge,” while for outsiders, they summarize what needs to be covered when attempting to have structure “emerge.”

### Sociopragmatics of Japanese: Theoretical Implications

Obana, Yasuko & Haugh, Michael

*Routledge Research in Pragmatics* (Routledge)

2023 : 03 224 p. Hardback 9780367521202 £120.00

Obana and Haugh question the extent to which commonly accepted theories in pragmatics can readily explain sociopragmatic phenomena in Japanese. Studies of Japanese in pragmatics have often challenged the cross-linguistic relevance of dominant theories. However, they have also inadvertently perpetuated stereotypes about the Japanese. It is often been assumed, for instance, that Japanese people are less strategic, more polite and more reliant on tacit forms of communication than speakers of other languages. But the Japanese are not as polite as one might think. The aim of this book is thus to question those folk assumptions around politeness, impoliteness, irony and indirectness while at the same time emphasizing that close examination of sociopragmatic phenomena in Japanese yields important empirical insights that combat common theoretical assumptions in pragmatics. The content is structured in three parts, in which the authors highlight a key building block of a theory of sociopragmatics.

### Teaching and Learning English in Japanese Classrooms: Teachers' Perspectives

Elliott, Darren (ed.)

(Cambridge Scholars)

2023 : 06 310 p. Hardback 9781527501669 £69.99

This book shows how English language instructors in Japan explored the questions and issues which most closely affected them and their students in the language learning process. Each of the teacher-researchers had a puzzle. After reviewing existing literature, each writer found a way to adjust their practice, and in these chapters, they report on the results. Topics include educational technology, learner autonomy, feedback, and novel approaches to listening, reading and writing instruction. Although the contributors are working in Japan, classroom practitioners from the wider international language teaching community can benefit from the practical teaching approaches and accessible descriptions of practitioner research to be found in this book. A secondary audience of educational managers and teacher trainers will also find value in chapters which outline the ways in which an environment conducive to practitioner research can be facilitated.

「NO NUKES: <ポスト3・11> 映画の力・アート」(名古屋大学出版会 2021 年刊) の英訳版

In the ongoing aftermath of the nuclear accident in 2011, filmmakers have continued to issue warnings about the state of Japanese society and politics, which remain mired in refusal to change. Nearly a decade in the making, *Japanese Filmmakers in the Wake of Fukushima* is based on in-person interviews with countless filmmakers, as well as continuous dialogue with them and their work. Author Wada-Marciano has expanded these dialogues to include students, audiences at screenings, critics, and researchers, and her observations are based on down-to-earth-exchange of ideas engaged in over a long period of time.

**Whistler and Artistic Exchange between Japan and the West: After Japonisme in Britain**

Ono, Ayako

*Routledge Research in Art History* (Routledge)

2023 : 04 138 p. 30 B/W Illustrations. Hardback 9781032380247 £120.00

Studies of Japonisme have been dominated by searching out relationships of influence between artworks-trying to identify which specific works influenced a particular artist. Ono argues that a more holistic understanding of 'spillover effects' is necessary in fully comprehending the nuances of these relationships. She bases this argument on documents and works of art in the context of globalisation, looking at the relationships between James McNeill Whistler and others with their contemporaries in the Japanese artistic and literary worlds. This was a more complex two-way exchange than is often appreciated, with Western artists taking inspiration from (to them) new Japanese styles, while Japanese artists and writers were trying to craft a 'modern', more western-influences style to reflect the modern nation of Japan emerging onto the world stage after centuries of relative isolation.

Stachurski, John

(MIT Pr.)

2022 : 08 400 p. Paperback 9780262544771 US\$75.00

This text provides an introduction to the modern theory of economic dynamics, with emphasis on mathematical and computational techniques for modeling dynamic systems. Written to be both rigorous and engaging, the book shows how sound understanding of the underlying theory leads to effective algorithms for solving real-world problems. The material makes extensive use of programming examples to illustrate ideas, bringing to life the abstract concepts in the text. Key topics include algorithms and scientific computing, simulation, Markov models, and dynamic programming. Part I introduces fundamentals and part II covers more advanced material. This second edition has been thoroughly updated, drawing on recent research in the field.

**Global Libidinal Economy**

Kapoor, Ilan et al.

(State U. of New York)

2023 : 05 220 p. Hardback 9781438493398 US\$95.00

Consumption, for example, is not simply a way of satisfying a material or biological need but a doomed attempt at soothing our deeply held sense of loss; and capital is not just a means to material growth and prosperity but is invested with "drive" that seduces, beguiles, and manipulates in the service of unending accumulation. Thus, in contrast to political economy, which assumes a rational subject, libidinal economy is founded on the notion of a desiring subject, who obeys a logic not of good sense or self-interest but profligacy and irrationality. By applying a psychoanalytic lens, *Global Libidinal Economy* thereby seeks to uncover the unconscious excesses and antagonisms emergent in such key political economy categories as "production," "trade," and "ecology," while also bringing out significant contemporary themes relating to "gender" and "race."

Viale, Riccardo

(MIT Pr.)

2022 : 10 248 p. Hardback 9780262544443 US\$27.95

We're all familiar with the idea of "nudging" - using behavioral mechanisms to encourage people to make certain choices - popularized by Richard Thaler and Cass Sunstein in their bestselling 2008 book *Nudge*. This approach, also known as "libertarian paternalism," goes beyond typical programs that simply provide information and incentives; nudges can range from automatic enrollment in a pension plan to flu-shot scheduling. In *Nudging*, Riccardo Viale explores the evolution of nudging and proposes new approaches that would empower citizens without manipulating them paternalistically. He shows that we can use the tools of the behavioral sciences without abandoning the principle of conscious decision-making.

Dutta, Prajit K. & Vergote, Wouter

(MIT Pr.)

2022 : 08 648 p. Hardback 9780262046527 US\$125.00

This widely used introduction to game theory is rigorous but accessible, unique in its balance between the theoretical and the practical, with examples and applications following almost every theory-driven chapter. In recent years, game theory has become an important methodological tool for all fields of social sciences, biology and computer science. This second edition of *Strategies and Games* not only takes into account new game theoretical concepts and applications such as bargaining and matching, it also provides an array of chapters on game theory applied to the political arena. New examples, case studies, and applications relevant to a wide range of behavioral disciplines are now included. The authors map out alternate pathways through the book for instructors in economics, business, and political science.

2023 : 04 432 p. Hardback 9780226824598 ¥17,640 Paperback 9780226825137 ¥5,880

*Banking on Slavery* sheds light on precisely how the financial relationships between banks and slaveholders worked across the nineteenth-century South. Murphy argues that the rapid spread of slavery in the South during the 1820s and '30s depended significantly upon southern banks' willingness to financialize enslaved lives, with the use of enslaved individuals as loan collateral proving central to these financial relationships. She makes clear how southern banks were ready - and, in some cases, even eager - to alter time-honored banking practices to meet the needs of slaveholders. In the end, many of these banks sacrificed themselves in their efforts to stabilize the slave economy. Murphy also details how banks and slaveholders transformed enslaved lives from physical bodies into abstract capital assets. Her book provides an essential examination of how our nation's financial history is more intimately intertwined with the dehumanizing institution of slavery than scholars have previously thought.

### Fiscal Policy under Low Interest Rates

Blanchard, Olivier

(MIT Pr.)

2023 : 01 192 p. Paperback 9780262544870 US\$40.00

There is a wide set of opinions about the direction that fiscal policy should take. Some, pointing to the high debt levels, make debt reduction an absolute priority. Others, pointing to the low interest rates, are less worried; they suggest that there is still fiscal space, and, if justified, further increases in debt should not be ruled out. Blanchard argues that low interest rates decrease not only the fiscal costs of debt but also the welfare costs of debt. At the same time, he shows how low rates decrease the room to maneuver in monetary policy - and thus increase the benefits of using fiscal policy, including deficits and debt, for macroeconomic stabilization. In short, low rates imply lower costs and higher benefits of debt. Having sketched what optimal policy looks like, Blanchard considers three examples of fiscal policy in action: fiscal consolidation in the wake of the Global Financial Crisis, the large increase in debt in Japan, and the current US fiscal and monetary policy mix. His conclusions hold practical implications for economic and fiscal policy makers, bankers, and politicians around the world.

This agenda-setting book presents a framework for creating a more just and equitable care-centered world. Climate change, pandemic events, systemic racism, and deep inequalities have all underscored the centrality of care in our lives. Yet care work is, for the most part, undervalued and exploited. In this book, Robert Gottlieb examines how a care economy and care politics can influence and remake health, climate, and environmental policy, as well as the institutions and practices of daily life. He shows how, through this care-centered politics, we can build an ethics of care and a society of cooperation, sharing, and solidarity.

And yet, cities also often harbor the solutions to the inequalities they create, as this book makes clear. With examples drawn from cities worldwide, *Co-Cities* outlines practices, laws, and policies that are presently fostering innovation in the provision of urban services, spurring collaborative economies as a driver of local sustainable development, and promoting inclusive and equitable regeneration of blighted urban areas.

In *A Vital Frontier* Andrea Muehlebach examines the work of activists across Europe as they organize to preserve water as a commons and public good in the face of privatization. Traversing social, political, legal, and hydrological terrains, Muehlebach situates water as a political fault line at the frontiers of financialization, showing how the seemingly relentless expansion of capital into public utilities is being challenged by an equally relentless and often successful insurgence of political organizing. Drawing on ethnographic research, Muehlebach presents water protests as a vital politics that comprises popular referenda, barricades in the streets, huge demonstrations, the burning of utility bills, and legal disputes over transparency and contracts.

Losh, Elizabeth

(MIT Pr.)

2022 : 09 304 p. Paperback 9780262047050 US\$24.95

Smartphones and other digital devices seem to give us a direct line to politicians. But is interacting with presidential tweets really a manifestation of digital democracy? In *Selfie Democracy*, Elizabeth Losh examines the unintended consequences of politicians' digital strategies, from the Obama campaign's pioneering construction of an online community to Trump's Twitter dominance. She finds that politicians who use digital media appeal to the same fantasies of digital connection, access, and participation peddled by Silicon Valley. Meanwhile, smartphones and social media don't enable participatory democracy so much as they incentivize citizens to perform attention-getting acts of political expression.

### Tradition and the Deliberative Turn: A Critique of Contemporary Democratic Theory

Holston, Ryan R.

(State U. of New York)

2023 : 03 218 p. Hardback 9781438492094 US\$95.00

This book changes the narrative regarding democratic deliberation. It does so by bringing to bear insights into the nature of morality and discourse associated with one of the twentieth century's foremost philosophers of history, Hans-Georg Gadamer. *Tradition and the Deliberative Turn* thus reframes the discussion about deliberative democracy with a robust historical sensibility, which has largely been missing from this conversation. Gadamer's "rehabilitation" of tradition shows how the concrete ethical life does not merely occlude but also facilitates moral understanding, providing a particular vantage point from which we perceive the world. What other scholars have overlooked is that such a perspective is therefore always limited. Drawing on Gadamer's practical philosophy, an underappreciated element in his corpus, Ryan R. Holston argues for the need to cultivate these historically-rooted and local relationships and the shared meanings to which they give life.

2023 : 02 264 p. Hardback 9781478016564 US\$99.95 Paperback 9781478019206 US\$26.95

The struggle against neoliberal order has gained momentum over the last five decades---to the point that economic elites have not only adapted to the Left's critiques but incorporated them for capitalist expansion. Venture funds expose their ties to slavery and pledge to invest in racial equity. Banks pitch microloans as a path to indigenous self-determination. Fair-trade brands narrate consumption as an act of feminist solidarity with women artisans in the global South. In *Capitalist Humanitarianism* Lucia Hulsether examines these projects and the contexts of their emergence. Blending historical and ethnographic styles, and traversing intimate and global scales, Hulsether tracks how neoliberal self-critique creates new institutional hegemonies that, in turn, reproduce racial and neocolonial dispossession.

*Negotiation Dynamics to Denuclearize North Korea* brings together country experts with negotiation specialists to apply negotiation theory to the North Korea denuclearization process. Country expert chapters provide a detailed assessment of the goals, motives, and strategies of the six parties - North Korea, South Korea, the United States, China, Japan, and Russia - along with contextual variables of each player such as political, economic, and social conditions while the negotiation scholars collate and scrutinize the results of these key variables. Based on thorough descriptive contexts provided by the country experts, the negotiation scholars identify the lack of two factors, party cohesion and ripeness, as detriments to successful North Korea nuclear negotiations.

After the Cold War, a new era began in the Eurasian region, with the countries that gained their independence from the USSR acquiring a place in the international system. After 1991, the absence of strong international gravity in Russia increased the positive relations of many countries with the West. As this book shows, across the world, there are regions caught between identity and power. In this respect, the ideological origin of the Russian Federation's foreign policy goals is connected with its position as a great power. On this note, the book analyses the great powers' challenges in Eurasia within the framework of strategic interests, conflict, and cooperation.

2022 : 12 344 p. Hardback 9781478016687 US\$104.95 Paperback 9781478019312 US\$28.95

The contributors to *Siting Postcoloniality* reevaluate the notion of the postcolonial by focusing on the Sinosphere - the region of East and Southeast Asia that has been significantly shaped by relations with China throughout history. Pointing out that the history of imperialism in China and Southeast Asia is longer and more complex than Euro-American imperialism, the contributors complicate the traditional postcolonial binaries of center-periphery, colonizer-colonized, and developed-developing. Among other topics, they examine socialist China's attempts to break with Soviet cultural hegemony; the postcoloniality of Taiwan as it negotiates the legacy of Japanese colonial rule; Southeast Asian and South Asian diasporic experiences of colonialism; and Hong Kong's complex colonial experiences under the British, the Japanese, and mainland China.

### The Presidentialization of Japanese Politics

Iwasaki, Masahiro

*Routledge Contemporary Japan Series* (Routledge)

2023 : 04 162 p. Hardback 9780815366713 £120.00

Are we seeing the presidentialization of politics in Japan? Certainly, many recent prime ministers have demonstrated powerful leadership, notably Junichiro Koizumi and Shinzo Abe. While the phenomenon of presidentialization has been much discussed for years, the Japanese case has not received much attention in the English language. Iwasaki analyses the state of Japanese politics using the established analytical framework of presidentialization - looking at leadership power resources, leadership autonomy, and the personalization of the electoral process - and assesses the factors that have been claimed to lead to similar changes in other countries. He argues that there are also unique variables that contribute to the presidentialization of Japanese politics. Most notably, the introduction of public subsidies to political parties and electoral reform in 1994.

### Deconstructive Constitutionalism: Derrida Reading Kant

de Ville, Jacques

*SUNY series in Contemporary Continental Philosophy* (State U. of New York)

2023 : 01 218 p. Hardback 9781438491714 US\$95.00

Kant laid the foundation of constitutionalism through his exposition of freedom, practical reason, and moral law. However, constitutionalism is under severe strain due to the challenges posed by inter alia climate change, global health, global conflict, authoritarianism, authoritarian populism, religious fundamentalism, migration, and inequality. *Deconstructive Constitutionalism* investigates, by way of Derrida's engagements with Kant, how the foundations of constitutionalism can be conceived differently to address some of these twenty-first-century challenges. The book examines the possible implications of such a re-reading of Kant for democracy, the human-animal relation, criminal law and punishment, as well as for a global constitutional order.

Turner, Ben

*SUNY series in Contemporary Continental Philosophy* (State U. of New York)

2023 : 03 267 p. Hardback 9781438492032 US\$95.00

*Returning to Judgment* provides the first extensive treatment of political judgment in the work of Bernard Stiegler and the first account of his significance for contemporary continental political thought. Ben Turner argues that Stiegler breaks with his predecessors in continental philosophy by advocating for, rather than retreating from, the task of proposing totalizing judgments on political problems that extend beyond the local and the particular. He shows that the reconciliation of judgment with continental political thought's commitment to anti-totalization structures the entirety of Stiegler's philosophy and demonstrates that this theory of the political decision highlights the difficulties that contemporary political ontology faces when addressing global and large-scale political problems.

Does Confucianism conflict with liberalism? *Confucian Liberalism* sheds new light on this long-standing debate entwined with the discourse of Chinese modernity. Focusing on the legacy of Mou Zongsan, the book significantly recasts the moral character and political ideal of Confucianism, accompanied by a Hegelian retreatment of the multiple facets of Western modernity and its core values, such as individuality, self-realization, democracy, civilized society, citizenship, public good, freedom, and human rights. The book offers a culturally sensitive way of reevaluating liberal language and forges a reconciliation between the two extremes of anti-Confucian liberalism and anti-liberal Confucianism.

*SUNY Series in Religious Studies* (State U. of New York)

2023 : 07 352 p. Hardback 9781438464411 US\$95.00

*The Sound of Vultures' Wings* offers the first in-depth exploration of the music of the Tibetan Chöd tradition, which is based on the liturgical song-poems of the twelfth-century Tibetan female ascetic Machik Labdrön (1055-1153). Chöd is a musical/meditative Vajrayāna method for cutting off the root of suffering, namely, egoic identification with the body, or the belief that the "I" is the locus of the "self." Chöd is regarded by many Tibetan Lamas as one of the most effective Buddhist practices for spiritual and social transformation. Jeffrey W. Cupchik details the significance of the complex, interwoven performative aspects of this meditative ritual and explains how its practice can bring about experiences of insight and inner transformation. In doing so, he undoes the notion of meditation as exclusively an experience of silence and stillness.

**China and Its Small Neighbors: The Political Economy of Asymmetry, Vulnerability, and Hedging**

Kim, Sung Chull

(State U. of New York)

2023 : 03 306 p. Hardback 9781438492353 US\$95.00

In *China and Its Small Neighbors*, Sung Chull Kim examines the political implications of the economic asymmetry between China and its small neighbors, part of wider changes in international relations brought about by the rise of China. While being critical of the current trend that focuses on the China-U.S. rivalry alone, Kim argues that a microanalysis of China's advances toward its neighbors is a guide to understanding the trajectory of China's expanding influence and transitions in world politics more broadly. Economic asymmetry - as seen in trade concentration, non-transparency, and reliance on bilateral aid - has made China's small neighbors vulnerable on the political front, thus generating potential threats to their sovereignty and independence. Because China has the upper hand in the bilateral relationships, these weak states practice dual-core hedging as a strategy for survival. They hedge on China for expected economic benefits and at the same time hedge against their powerful neighbor to mitigate the risks involved in that hedging-on. Each small state's mode of hedging depends on its degree of vulnerability and its availability of policy instruments such as multilateral institutions and bilateral partnerships with extra-regional powers.

**The China Record: An Assessment of the People's Republic**

Wang, Fei-Ling

(State U. of New York)

2023 : 03 421 p. Hardback 9781438492278 US\$95.00

*The China Record* provides readers with an ambitious, detailed, and wide-ranging examination of the People's Republic of China (PRC) under the Chinese Communist Party (CCP) both as an alternative mode of political system and a distinctive model of socioeconomic development. Fei-Ling Wang assesses the record of the economy under the CCP, people's lives and rights, and China's spiritual and physical ecology. He focuses on issues of political representation, criminal justice, fiscal and monetary policies, state-led growth, living standards, academia and education, inequality and poverty, disaster relief and pandemic prevention, culture and ethics, and the protection of antiquities and the environment. Using both quantitative and qualitative data, *The China Record* seeks to provide a solid and balanced, yet unflinching, view about the nature, strengths, weaknesses, and implications of the PRC as an emerging superpower and a potential world leader. It is an effort to introduce a holistic evaluation of the CCP-PRC's overall efficacy, efficiency, power, sustainability, and desirability - or the lack thereof.

### Being Dead Otherwise

2023 : 03 256 p. Hardback 9781478017141 US\$99.95 Paperback 9781478019848 US\$25.95

『菊とポケモン—グローバル化する日本の文化力』の著者であり、日本文化研究者のアン・アリソンが、現代日本の葬送文化の変化を詳細に考察する

With an aging population, declining marriage and childbirth rates, and a rise in single households, more Japanese are living and dying alone. Many dead are no longer buried in traditional ancestral graves where descendants would tend their spirits, and individuals are increasingly taking on mortuary preparation for themselves. In *Being Dead Otherwise* Anne Allison examines the emergence of new death practices in Japan as the old customs of mortuary care are coming undone. She outlines the proliferation of new industries, services, initiatives, and businesses that offer alternative means—ranging from automated graves, collective grave sites, and crematoria to one-stop mortuary complexes and robotic priests—for tending to the dead. These new burial and ritual practices provide alternatives to long-standing traditions of burial and commemoration of the dead.

### Japanese Digital Cultural Promotion: Online Experience of Kyoto

Gadjeva, Nadejda

*Routledge Contemporary Japan Series* (Routledge)

2023 : 06 176 p. Hardback 9781032446653 £130.00

Gadjeva uses Kyoto as a case study to explore the innovative mechanisms being used to promote Japanese culture and cultural properties since the outbreak of COVID-19. Beginning by setting out the main initiatives and actors involved in preserving, introducing and utilising Kyoto's cultural heritage, Gadjeva proceeds to discuss alternative approaches using digital technologies. These tools include remote access immersive reality, virtual reality, augmented reality, augmented virtuality, and mixed reality. She looks at how such approaches have been applied to Kyoto's digital museums, real-time online experiences, and other virtual projects presenting tangible, intangible, and folk heritage. In doing so she draws on a wide range of interviews with experts from the Japan Foundation, the Kyoto Art Center, and other related institutions to investigate the limitations and possible strategies for further development of these practices.

### Philosophy of the Tourist

Azuma, Hiroki

*Mono / Urbanomic* (MIT Pr.)

2023 : 04 400 p. Paperback 9781915103000 US\$29.95

Tourism is a characteristically modern phenomenon, yet modern thinkers have tended to deride the tourist as a figure of homogenizing globalism. This philosophical study considers the tourist anew, as a subject position that enables us to redraw the map of globalized culture in an era increasingly in revolt against the liberal intellectual worldview and its call for the welcome of the "Other." Why has the tourist proved so resistant to philosophical treatment, asks Hiroki Azuma. Tracing the reasons for this exclusion through the work of Rousseau and Voltaire, and subsequently in Kant, Carl Schmitt, Alexandre Kojève, Hannah Arendt, and Hardt and Negri, Azuma contends that the figure of the tourist has been rendered illegible by becoming ensnared in a series of misleading conceptual dichotomies and a linear model of world history.

### Enduring Work: Experiences with Canada's Temporary Foreign Worker Program

Connelly, Catherine E.

(McGill-Queen's U.P.)

2023 : 05 200 p. Hardback 9780228016670 US\$120.00 Paperback 9780228016687 US\$32.95

In *Enduring Work* Catherine Connelly draws on over one hundred interviews with people connected to different aspects of this program, analyzing their experiences from the perspective of organizational behaviour and human resources management. She compares the lived reality of agricultural workers, in-home caregivers, and low- and high-wage workers, showing how and why each group is vulnerable to mistreatment, albeit in different ways. She further explores how employment agencies and immigration consultants contribute to program abuses. Critically, *Enduring Work* provides the perspectives of employers, distinguishing between the reluctant users of the program who follow the rules and the reckless users who do not.

## Game Theory and Behavior

Carpenter, Jeffrey & Robbett, Andrea

(MIT Pr.)

2022 : 12 768 p. Hardback 9780262047296 US\$125.00

This introductory text on game theory provides students with both the theoretical tools to analyze situations through the logic of game theory and the intuition and behavioral insights to apply these tools to real-world situations. It is unique among game theory texts in offering a clear, formal introduction to standard game theory while incorporating evidence from experimental data and introducing recent behavioral models. Students will not only learn about incentives, how to represent situations as games, and what agents “should” do in these situations, but they will also be presented with evidence that either confirms the theoretical assumptions or suggests a way in which the theory might be updated.

## The Apple II Age: How the Computer Became Personal

Nooney, Laine

(Univ. of Chicago Pr.)

2023 : 05 352 p. Hardback 9780226816524 ¥4,700

Skip the iPhone, the iPod, and the Macintosh. If you want to understand how Apple Inc. became an industry behemoth, look no further than the 1977 Apple II. Designed by the brilliant engineer Steve Wozniak and hustled into the marketplace by his Apple cofounder Steve Jobs, the Apple II became one of the most prominent personal computers of this dawning industry. The Apple II was a versatile piece of hardware, but its most compelling story isn't found in the feat of its engineering, the personalities of Apple's founders, or the way it set the stage for the company's multibillion-dollar future. Instead, historian Laine Nooney shows, what made the Apple II iconic was its software. In software, we discover the material reasons people bought computers. Not to hack, but to play. Not to code, but to calculate. Not to program, but to print. The story of personal computing in the United States is not about the evolution of hackers - it's about the rise of everyday users.

## Machine Learning from Weak Supervision: An Empirical Risk Minimization Approach

Sugiyama, Masashi & Bao, Han

*Adaptive Computation and Machine Learning series* (MIT Pr.)

2022 : 08 320 p. Hardback 9780262047074 US\$65.00

Standard machine learning techniques require large amounts of labeled data to work well. When we apply machine learning to problems in the physical world, however, it is extremely difficult to collect such quantities of labeled data. In this book Masashi Sugiyama, Han Bao, Takashi Ishida, Nan Lu, Tomoya Sakai and Gang Niu present theory and algorithms for weakly supervised learning, a paradigm of machine learning from weakly labeled data. Emphasizing an approach based on empirical risk minimization and drawing on state-of-the-art research in weakly supervised learning, the book provides both the fundamentals of the field and the advanced mathematical theories underlying them. It can be used as a reference for practitioners and researchers and in the classroom.
