スティーヴン・グリーンブラット著『アダムとイヴの盛衰記』

The Rise and Fall of Adam and Eve

Greenblatt, Stephen

(W.W. Norton)

2017 : 09 368 p. Hardback 9780393240801 US\$27.95

Bolder, even, than the ambitious books for which Stephen Greenblatt is already renowned, *The Rise and Fall of Adam and Eve* explores the enduring story of humanity's first parents. Comprising only a few ancient verses, the story of Adam and Eve has served as a mirror in which we seem to glimpse the whole, long history of our fears and desires, as both a hymn to human responsibility and a dark fable about human wretchedness.

The Critics and the Prioress: Antisemitism, Criticism, and Chaucer's Prioress's Tale

Johnson, Hannah & Blurton, Heather

(U. of Michigan Pr.)

2017 : 04 248 p. Hardback 9780472130344 US\$70.00

Of all the *Canterbury Tales*, Geoffrey Chaucer's *Prioress's Tale*, in which a young schoolboy is murdered by Jews for singing a song in praise of the Virgin Mary, poses a problem to contemporary readers because of the antisemitism of the story it tells. Over the past fifty years, scholars have asked: Is the antisemitism in the tale that of the Prioress? Or of Chaucer the pilgrim? Or of Chaucer the author? Or, indeed, whether one ought to discuss antisemitism in the *Prioress's Tale* at all, considering the potential anachronism of expecting medieval texts to conform to contemporary ideologies. *The Critics and the Prioress* responds to a critical stalemate between the demands of ethics and the entailments of methodology.

The Great Tower of Elfland: The Mythopoeic Worldview of J. R. R. Tolkien, C. S. Lewis, G. K. Chesterton, and George Macdonald

Rhone, Zachary A.

(Kent State U.P.)

2017 : 05 184 p. Hardback 9781606353295 US\$45.00

This text overturns the misapplication of a divided worldview among two Inklings, J. R. R. Tolkien and C. S. Lewis, and their forerunners, G. K. Chesterton and George MacDonald. Analyzing their literary, scholarly, and interpersonal texts, *The Great Tower of Elfland* clarifies the unities of their thinking through five general categories: literature and language, humanism, philosophy of the personal journey, philosophy of history and civilization, and their Christian mythopoeia.

From the pen of eminent Tolkien scholar Verlyn Flieger, the individual essays in this collection were written over a span of twenty years, each written to fit the parameters of a conference, an anthology, or both. They are revised slightly from their original versions to eliminate repetition and bring them up to date. Grouped loosely by theme, they present an unpatterned mosaic, depicting topics from myth to truth, from social manners to moral behavior, from textual history to the microparticles of Middle-earth.

The Volume 3 stories were all written between March 1944 and March 1945, and the surviving letters of this period reveal the private conflict raging between Bradbury's efforts to define a distinct style and creative vision at home in Los Angeles and the tyranny of genre requirements imposed by the distant pulp publishing world in New York.

In *Architecture and the Forest Aesthetic* forest is a large-scale urban construct that is far more extensive and nuanced than trees and shrubbery. The forest aesthetic opens designers to the forest as a model for an urban architecture of permeable floors, protective canopies, connected food chains, beneficial decomposition, and resilient ecologies.

Kevins, Anthony

Changing Welfare States (Amsterdam U.P.)

In recent decades, and particularly since the financial crisis, continental Europe has seen an increasing gap between those workers who have well-protected, good-paying jobs with strong benefits and those who work lower-quality, nonstandard jobs, or who have no regular work at all. This situation would seem to call for increased spending on the social safety net, yet governments throughout the region have instead been turning to austerity. In the face of that reality, the options for helping disadvantaged workers are to extend coverage through re-allocating the benefits given to higher-level workers, maintain the benefits of the well-off as the number of outsiders continues to grow, or simply ignore the problem.

Cities of Power: The Urban, The National, The Social, The Global

Therborn, Göran

(Verso)

2017 : 05 320 p. Hardback 9781784785444 £20.00

In this brilliant, very original survey of the politics and meanings of urban landscapes, leading sociologist Göran Therborn offers a tour of the world's major capital cities, showing how they have been shaped by national, popular, and global forces. Their stories begin with the emergence of various kinds of nation-state, each with its own special capital city problematic. In turn, radical shifts of power have impacted on these cities' development, in popular urban reforms or movements of protest and resistance; in the rise and fall of fascism and military dictatorships; and the coming and going of Communism.

Class, Race and Marxism

Roediger, David

(Verso)

2017 : 07 192 p. Hardback 9781786631237 £19.99

Seen as a key figure in the critical study of whiteness, US historian David Roediger has sometimes received criticism, and praise, alleging that he left Marxism behind in order to work on questions of identity. This volume collects his recent and new work implicitly and explicitly challenging such a view. In his historical studies of the intersections of race, settler colonialism, and slavery, in his major essay (with Elizabeth Esch) on race and the management of labour, in his detailing of the origins of critical studies of whiteness within Marxism, and in his reflections on the history of solidarity, Roediger argues that racial division is not only part of the history of capitalism but also of the logic of capital.

Bullock, Ian

(Athabasca U.P.)

2017 : 03 428 p. Paperback 9781771991551 US\$44.95

Despite this reversal of fortunes, during the 1930s - years that witnessed the ascendancy of both Stalin and Hitler - the ILP demonstrated an unwavering commitment to democratic socialist thinking. Drawing extensively on the ILP's Labour Leader and other contemporary left-wing newspapers, as well as on ILP publications and internal party documents, Bullock examines the debates and ideological battles of the ILP during the tumultuous interwar period. He argues that the ILP made a lasting contribution to British politics in general, and to the modern Labour Party in particular, by preserving the values of democratic socialism during the interwar period.

Global Asia, 7 (Amsterdam U.P.)

2017 : 06 234 p. Hardback 9789462984288 £ 70.00

In recent decades, ties between Africa and Asia have greatly increased. And while most of the scholarly attention to the phenomenon has focused on China, often with an emphasis on asymmetric power relations in both politics and economics, this book takes a much broader view, looking at various small and medium-sized actors in Asia and Africa in a wide range of fields. It will be essential for scholars working on Asian-African studies and will also offer insights for policymakers working in this fast-changing field.

Szanto, Balazs

Asian Security Studies (Routledge)

2017 : 12 208 p. Hardback 9781138095588 £ 105.00

The Senkaku/Diaoyu Islands dispute is a prominent territorial dispute between China and Japan. This book critically assesses that dispute in a pragmatic, policy-oriented manner. The central question of the work focuses on the various military (direct invasion, coercion) and non-military (bilateral negotiations, binding and non-binding third party options and delaying) foreign policy avenues available to China to pursue its key interests over the disputed islands.

On Building Peace: Rescuing the Nation-State and Saving the United Nations

Schulenburg, Michael von der

(Amsterdam U.P.)

2017 : 05 282 p. Paperback 9789462984271 £ 22.95

On Building Peace seeks the answers that the UN Charter can no longer provide. Once meant as a guarantor for peace, the Charter was never designed to deal with intra-state conflicts and today its core principles are eroded. The book makes two rather simple, but possibly unpopular suggestions for preserving future peace: first, we must rescue the nation-state, not despite but because of globalization, and second, we must not further undermine the United Nations, but expand its Charter for dealing collectively with this triple threat.

The book outlines the role that Sino-Japanese competition plays in East Asian security, an area of study largely overlooked in contemporary writing on Asian security, which tends to focus on US-China relations and/or US hegemony in Asia. The volume focuses on Chinese and Japanese foreign policy under President Xi Jinping and Prime Minister Shinzō Abe, and regional security dynamics within and between Asian states/institutions since 2012.

Ichihara, Maiko

Politics in Asia (Routledge)

2017 : 09 168 p. Hardback 9781138957053 £105.00

This book intends to answer the questions of why Japan has started emphasizing democracy assistance and why it has relegated itself to a minor role in democracy assistance nevertheless. It argues that Japan's emphasis on democracy assistance reveals its intention to increase its political influence with regards to China based on democratic values, and its usage of the term "democracy assistance" is a performative speech act to orchestrate a comprehensive approach for international democracy support.

Raunio, Tapio & Wagner, Wolfgang (ed.)

West European Politics (Routledge)

The articles are specifically chosen to cover the whole range of foreign affairs questions from crisis management and military missions, arms trade, the Common Foreign and Security Policy (CFSP) of the European Union (EU), international energy agreements, to international trade negotiations. Drawing on a principal-agent framework, the book challenges the conventional wisdom of 'executive autonomy' in foreign affairs, with parliaments using multiple ex ante and ex post instruments to monitor, oversee and control governments in external relations.

Bamford, Kiff

Critical Lives (Reaktion Books)

2017 : 07 224 p. Paperback 9781780238081 £11.99

Jean-François Lyotard is one of the most important, and complex, French thinkers of the twentieth century. Best known in the English-speaking world for his book *The Postmodern Condition*, Lyotard produced a multi-faceted work that has often been obscured by its sometimes problematic association with the postmodern. His life refuses to follow the clear trajectory common to academics in France: it stalls and hesitates, with Lyotard's first 'career' consisting of fifteen years of militant Marxist political engagement.

In his book-length poem *Metamorphoses*, characters are transformed in ways that include losing their power of human speech. In *Tristia and Epistulae ex Ponto*, poems written after Ovid's exile from Rome in 8 ce, he represents himself as also having been transformed, losing his voice.

In healthcare settings, both patients and physicians use nonverbal communication (e.g. paralinguistic, kinesic, and proxemic cues) to convey their thoughts apart from verbal questions and answers, with the former describing their medical history and health issues and the latter providing medical advice and helpful treatment plans.

Here, Jan Morris not only tells the dramatic story of the magnificent ship itself—from secret wartime launch to futile sacrifice at Okinawa—but, more fundamentally, interprets the ship as an allegorical figure of war itself, in its splendor and its squalor, its heroism and its waste. Drawing on rich naval history and rhapsodic metaphors from international music and art, *Battleship Yamato* is a work of grand ironic elegy.

Nuclear Planetary Science: Planetary Science Based on Gamma-Ray, Neutron and X-Ray Spectroscopy

Hasebe, Nobuyuki et al. (ed.)

Advances in Planetary Science, 1 (World Scientific)

2017 : 11 176 p. Hardback 9789813209701 ¥13,430

Nuclear planetary science has come to play an important role in our understanding of the origin and evolution of the planetary bodies in our solar system. A newly established branch of planetary science, its study aids in humankind's exploration of the present states of the structures of various planetary bodies (including the Earth), their atmospheres and their satellites, as well as small celestial bodies (e.g. asteroids), through direct observation. Knowing the elemental composition of the planetary bodies is essential in order to understand the formation and evolution of planetary bodies ? just as important as it is to know the mass, radius, density and orbit of the celestial body.
